

Enhancing, Volumising, Non-Surgical

# Aesthetic & Anti-Ageing Treatments

Dr, Shyam Pankhania (BDS) Full Member of the  
British Academy of Cosmetic Dentists

## Overview

Society places increasing pressure on the way we look and it is easy to allow these pressures to affect self-esteem. I believe confidence and self-assurance are two highly attractive qualities that cannot be achieved with treatment alone. Whilst it is important to not over-emphasise physical attributes you may wish to have an assessment to restore or maintain a healthier appearance.

Dr. Shyam Pankhania can assist you with your concerns and see if you are suitable for non-surgical enhancements to improve your facial aesthetics. He can assess your specific needs and provide you with an insight into revitalising your look.

Anti-wrinkle injections help prevent the formation of new wrinkles developing. Dermal fillers can be used to enhance certain facial features and treat lines and wrinkles.

## Anti-Wrinkle Injections

Wrinkling is a prominent feature of skin ageing. Repeated movement of facial musculature causes lines that over time become permanently etched into the skin. Anti-wrinkle injections are the most popular non-surgical cosmetic procedure performed worldwide. They relax muscles that cause wrinkles future proofing you from the ageing process and allowing you to look younger for longer.

Commonly treated areas are: horizontal forehead lines, frown lines, crow's feet, bunny lines, the upper lip and chin wrinkles.

## Nefertiti Neck Lift

The Nefertiti Neck Lift redefines the jaw and softens neck lines for a rejuvenating effect that presents smoother skin without the need for surgery.

## Cheek Slimming

For those that clench and grind their teeth, you may notice that you have very strong cheek features because your clenching muscles have become larger and stronger. This may be perceived as a more masculine feature. Cheek slimming involves reducing the strength of the clenching muscles to restore a slimmer appearance of the face.

## Dermal Fillers

Our skin loses elasticity, collagen and underlying fat as we age causing the face to sag and form lines, wrinkles and folds.

Dermal fillers are made from a product naturally found in our bodies called Hyaluronic Acid. When delivered in specific areas of the face it can be used to restore fullness and volume by plumping and firming. Dermal fillers are indicated for some facial wrinkles, folds and for more sophisticated applications such as facial sculpting and contouring. Dermal fillers typically last between 6 months to a year.

## Top Model Look

The top model look is given by sculpting dermal filler in the area of the cheek bone. This can provide stronger or rounder cheeks depending on the desired look. It will also reduce the nasolabial folds as the midface is restored. This procedure is also more commonly known as cheek or malar augmentation.

## Nasolabial folds (Laugh Lines)

Nasolabial folds are commonly known as smile lines or laugh lines and are caused by the midface slumping as the face ages. The first step to treating these lines is by augmenting the cheek area described in the procedure above “Top Model Look.” If there are still strong lines here, we can blend this area into the cheeks with dermal filler just beneath the fold.

## Lip Fillers

Lips are considered an essential in the perception of beauty for both men and women. Dermal fillers can enhance lip shape and volume in a natural way and would benefit patients with less defined lip shape and diminished lip volume from aging; as well as younger patients seeking lip enhancement.

# Treatment Prices

## Anti-Wrinkle Injections

1 area	£195

## About Me

My name is Dr. Shyam Pankhania and I am a Dentist that works at BUPA Broadway Dental Practice in Peterborough since 2015. I graduated from the highly respected University of Sheffield Dental School in 2014. I have undertaken many courses to further my skills and learning enabling me to become a Full Member of the prestigious British Academy of Cosmetic Dentsits (BACD). I have also trained with some of the leading clinicians in Facial Aesthetics on Harley Street to be able to extend anti-ageing and non-surgical beautifying treatments for my patients. With my in-depth training and work ethic, you can be assured that I have very high standards of all my work.

At your consultation you will see that I will take the time to understand your needs and take the time to discuss any concerns you have.

My vision is to provide the total aesthetic experience for my patients to achieve a naturally beautiful, healthy physical appearance. This means you can look amazing and have confidence within yourself.
